

Michelle Asuamah

FULL STACK DEVELOPER

PROFESSIONAL BIO

I am a highly self-motivated developer with a certificate in full-stack web development. In previous studies I earned a Bachelor's degree in Psychology and Human Resources, while my lifelong favourite school subject is mathematics.

Through all my academics and even some personal hobbies, I have always enjoyed problem solving to the highest degree. I'm also a life-long learner who is always eager to build, learn, and create.

My current technological skills include frontend technologies such as JavaScript, HTML, and CSS, as well as backend technologies including Node.js, Express.js, and MySQL.

I have every intention to continue on this journey of increasing my knowledge and skills when it comes to technical programming. I plan to do so through work experience and remaining dedicated to my own self-teachings.

SKILLS & ABILITIES

- HTML
- CSS
- JavaScript
- GitHub
- Responsive Web Design
- OOP
- Node.js
- Express.js
- Bootstrap
- jQuery
- APIs
- AJAX
- MySQL
